Nextcloud resolved the following client address for the test request: "Invalid response when testing if the push server is a trusted proxy: invalid IP address syntax" instead of the expected "1.2.3.4" test value.

The following trusted proxies are currently configured: "127.0.0.1", ":::1", "192.168.51.40"

The following x-forwarded-for header was received by Nextcloud: "1.2.3.4" from the following remote: :::1

✓ All proxies in the chain appear to be trusted by Nextcloud

If you're having issues getting the trusted proxy setup working, you can try bypassing any existing reverse proxy

in your setup by setting the `NEXTCLOUD\_URL` environment variable to point directly to the internal Nextcloud webserver url

(You will still need the ip address of the push server added as trusted proxy)

Setup notify\_push (attempt 2/5)

✓ redis is configured

✓ push server is receiving redis messages

✓ push server can load mount info from database

✓ push server can connect to the Nextcloud server

× push server is not a trusted proxy by Nextcloud or another proxy in the chain.

Nextcloud resolved the following client address for the test request: "Invalid response when testing if the push server is a trusted proxy: invalid IP address syntax" instead of the expected "1.2.3.4" test value.

The following trusted proxies are currently configured: "127.0.0.1", ":::1", "192.168.51.40"

The following x-forwarded-for header was received by Nextcloud: "1.2.3.4" from the following remote: :::1

✓ All proxies in the chain appear to be trusted by Nextcloud

If you're having issues getting the trusted proxy setup working, you can try bypassing any existing reverse proxy

in your setup by setting the `NEXTCLOUD\_URL` environment variable to point directly to the internal Nextcloud webserver url

(You will still need the ip address of the push server added as trusted proxy)

Setup notify\_push (attempt 3/5)

✓ redis is configured

✓ push server is receiving redis messages

✓ push server can load mount info from database

✓ push server can connect to the Nextcloud server

× push server is not a trusted proxy by Nextcloud or another proxy in the chain.

Nextcloud resolved the following client address for the test request: "Invalid response when testing if the push server is a trusted proxy: invalid IP address syntax" instead of the expected "1.2.3.4" test value.

The following trusted proxies are currently configured: "127.0.0.1", ":::1", "192.168.51.40"

The following x-forwarded-for header was received by Nextcloud: "1.2.3.4" from the following remote: :::1

✓ All proxies in the chain appear to be trusted by Nextcloud

If you're having issues getting the trusted proxy setup working, you can try bypassing any existing reverse proxy

in your setup by setting the `NEXTCLOUD\_URL` environment variable to point directly to the internal Nextcloud webserver url

(You will still need the ip address of the push server added as trusted proxy)  
Setup notify\_push (attempt 4/5)

✓ redis is configured

✓ push server is receiving redis messages

✓ push server can load mount info from database

✓ push server can connect to the Nextcloud server

× push server is not a trusted proxy by Nextcloud or another proxy in the chain.

Nextcloud resolved the following client address for the test request: "Invalid response when testing if the push server is a trusted proxy: invalid IP address syntax" instead of the expected "1.2.3.4" test value.

The following trusted proxies are currently configured: "127.0.0.1", ":::1", "192.168.51.40"

Setup notify_push (attempt 1/5)
✓ redis is configured
✓ push server is receiving redis messages
✓ push server can load mount info from database
✓ push server can connect to the Nextcloud server
× push server is not a trusted proxy by Nextcloud or another proxy in the chain.
Nextcloud resolved the following client address for the test request: "Invalid
response when testing if the push server is a trusted proxy: invalid IP address
syntax" instead of the expected "1.2.3.4" test value.
The following trusted proxies are currently configured: "127.0.0.1", "::1",
"192.168.51.40"
The following x-forwarded-for header was received by Nextcloud: "1.2.3.4"
from the following remote: ::1

✓ All proxies in the chain appear to be trusted by Nextcloud

```

If you're having issues getting the trusted proxy setup working, you can try bypassing any existing reverse proxy in your setup by setting the `NEXTCLOUD\_URL` environment variable to point

directly to the internal Nextcloud webserver url

(You will still need the ip address of the push server added as trusted proxy)

Setup notify\_push (attempt 2/5)

✓ redis is configured

✓ push server is receiving redis messages

✓ push server can load mount info from database

✓ push server can connect to the Nextcloud server

× push server is not a trusted proxy by Nextcloud or another proxy in the chain.

Nextcloud resolved the following client address for the test request: "Invalid response when testing if the push server is a trusted proxy: invalid IP address syntax" instead of the expected "1.2.3.4" test value.

The following trusted proxies are currently configured: "127.0.0.1", ":::1", "192.168.51.40"

The following x-forwarded-for header was received by Nextcloud: "1.2.3.4" from the following remote: :::1

✓ All proxies in the chain appear to be trusted by Nextcloud

If you're having issues getting the trusted proxy setup working, you can try bypassing any existing reverse proxy

in your setup by setting the `NEXTCLOUD\_URL` environment variable to point directly to the internal Nextcloud webserver url

(You will still need the ip address of the push server added as trusted proxy)

Setup notify\_push (attempt 3/5)

✓ redis is configured

✓ push server is receiving redis messages

✓ push server can load mount info from database

✓ push server can connect to the Nextcloud server

× push server is not a trusted proxy by Nextcloud or another proxy in the chain.

Nextcloud resolved the following client address for the test request: "Invalid response when testing if the push server is a trusted proxy: invalid IP address syntax" instead of the expected "1.2.3.4" test value.

The following trusted proxies are currently configured: "127.0.0.1", ":::1", "192.168.51.40"
